

## Gallant Cloud – Train2Game student studio in Microsoft Accelerator opportunity

Train2Game worked with studio Gallant Cloud as they took part in the first Microsoft Accelerator initiative in London. The team thoroughly enjoyed the experience and featured heavily in the press.

*Ben Cooper, Gallant Cloud: "Just wanted to say thanks to the Train2Game team for all the help they gave us. It was very much appreciated and we nailed it on demo day!"*

As a result of the initiative the team were put in touch with the wider gaming industry. They attended games industry events and conferences. The team were mentored by Train2Game and Microsoft experts. They also received further tutoring from members of the gaming and business community. The team were also lucky enough to be taken to Aqua City in Slovakia as a reward for taking part in the programme.

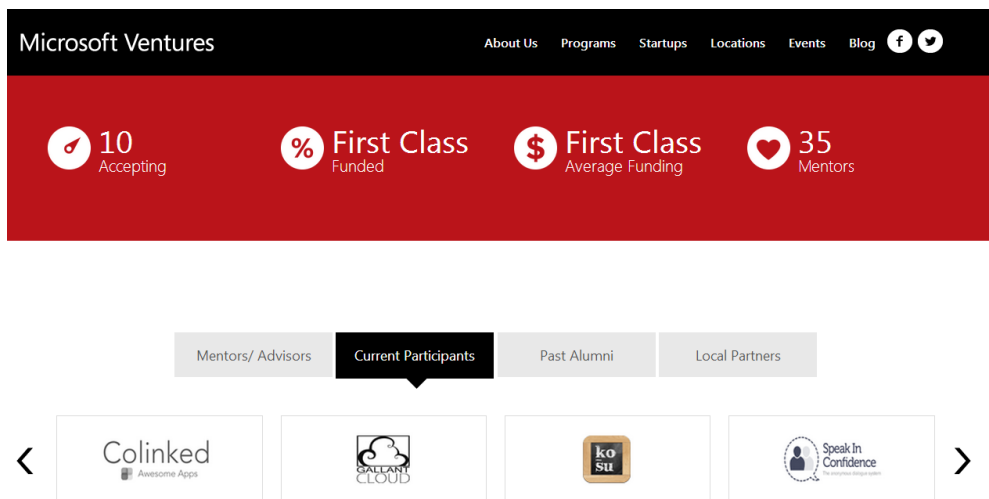

Coverage of the initiative was extensive, with placements on: The Microsoft Accelerator Website, numerous mentions in games industry trade publication – Develop and on Gallant Cloud's own official website. Train2Game also covered the scheme extensively with videos and content on Train2Game's official YouTube, Twitter and Facebook, accounts.

## Train2Game News: Gallant Cloud Video

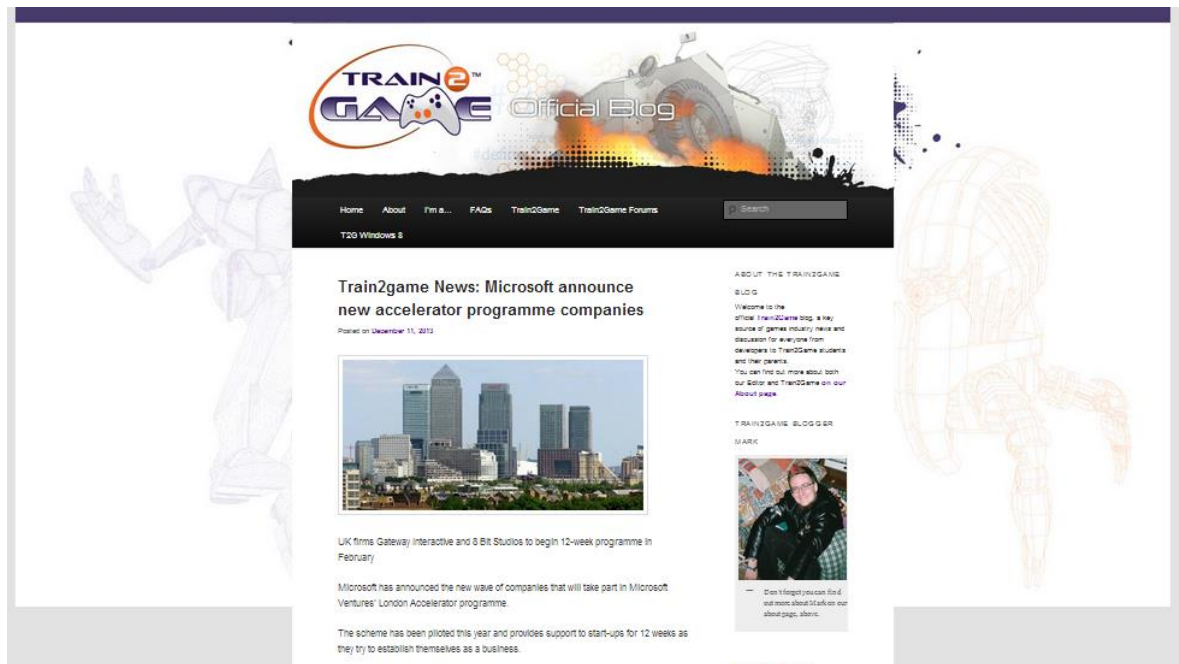

A Train2Game start up games studio named Gallant Cloud games have been invited to be a part of a Microsoft Accelerator Programme.

Microsoft described the Accelerator programme as an intensive chance for start-up businesses' focused on anything from games to new social media ideas to break into the big time. Microsoft will be aiding the start up as much as they can to help them.

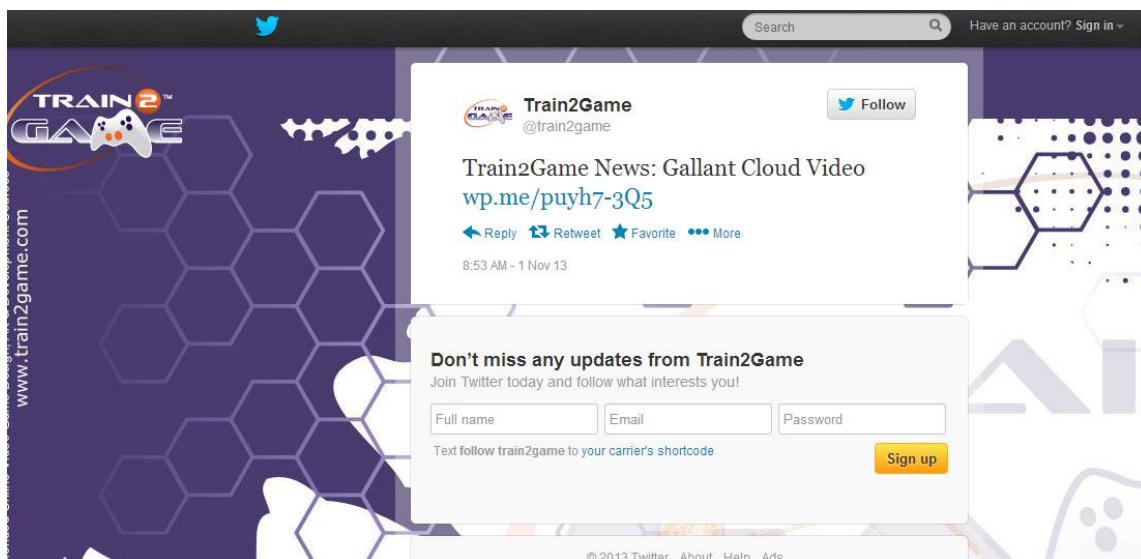

Gallant Cloud was interviewed whilst on a recent trip to the Train2Game head office in Luton about their experiences so far and you can watch the video below.
